## UX/UI Designer — Product Design & Design Systems

Poços de Caldas, Minas Gerais, Brazil (Remote / LATAM) | +55 35 998043084 | jenniferpaivab01@gmail.com |  
linkedin.com/in/jenniferpaiva-98aa66278

### PROFESSIONAL SUMMARY

Mid-level UX/UI Designer with hands-on, end-to-end product design experience across fintech and conversational/messaging products. Skilled in translating complex, data-heavy workflows into clear, accessible interfaces, working independently within distributed, cross-functional teams (Product, Engineering, Research, and Legal). Strong current proficiency in Figma, design systems, usability testing, and A/B testing, with direct experience designing conversational (WhatsApp) messaging experiences for global, omnichannel products.

### CORE SKILLS

- Figma (Certified — Pro Figma UI Design) — wireframes, prototyping, design-handoff, design systems
- End-to-end Product UX: user research, information architecture, user flows & journeys, interaction & visual design
- Complex/data-heavy workflow design: multi-filter analytics dashboards, financial data visualization
- Usability testing & A/B testing (comparative studies, testing platforms, qualitative + quantitative validation)
- Accessibility (WCAG) and inclusive design for diverse user profiles
- Conversational / messaging UX design (WhatsApp-based experiences)
- Cross-functional collaboration with Product, Engineering, Research, and Legal/Compliance
- Agile methodologies (Scrum, Kanban); mobile-first and web design; English — upper-intermediate

### PROFESSIONAL EXPERIENCE

#### UX/UI Designer | W1 Consultoria — S1NC (Financial Product, Contract) *Mar 2025 – Present*

*Remote*

- Own end-to-end UX for S1NC, a financial digital product, from user research through delivery and validation, working as an embedded contractor within a distributed product team.
- Design the product's main analytics dashboard, featuring multiple charts and simultaneous filters for financial data analysis — hands-on experience with complex, data-heavy workflow design.
- Collaborate directly with the Legal team to help define Terms of Use and other compliance-related content, ensuring UX decisions align with legal and regulatory requirements.
- Plan and run A/B and comparative usability tests, including structured studies with two distinct user groups evaluating different layouts/experiences for the same screen objective, plus quantitative testing via dedicated platforms.
- Design for a globally-used product with downloads across multiple regions, iterating on flows, information architecture, and design system components in Figma.
- Partner cross-functionally with Product and Engineering to translate research insights into shippable, accessible interfaces.

#### Product Designer | Bia Today *Feb 2023 – Jan 2025*

*Poços de Caldas, Minas Gerais, Brazil*

- Designed end-to-end experiences for an omnichannel benefits-club product, with WhatsApp as the primary conversational messaging channel — direct hands-on experience designing conversational/messaging UX.
- Led strategic UX work: persona mapping, end-to-end journey design, and information architecture, aligning user needs with business rules and product metrics.
- Produced low-, mid-, and high-fidelity prototypes in Figma; ran usability testing and qualitative analysis to validate and iterate on designs.
- Applied WCAG accessibility principles to create scalable, inclusive interfaces for diverse user profiles.
- Collaborated closely with Product, Technology, and stakeholders in agile, feedback-driven cycles.

### EDUCATION

#### Cruzeiro do Sul Virtual — Technology Degree (CST) in Product Design

*July 2024 – July 2026 (in progress)*

### CERTIFICATIONS

- Pro Figma UI Design — Figma Design de Interfaces
